

## **Summary of Virgo outreach activities**

L. Conti, INFN Padova  
on behalf of the Virgo Outreach Group

We summarize the outreach activities carried out since the past year by the Virgo Collaboration. They cover a wide range of activities, ranging from participation to events across Europe to art-and-science projects (exhibitions, performances..), to site visits, to web site and social networks. Finally we report about a new initiative aiming at developing a tactile seminar on gravitational wave science and technology accessible also to visually impaired people.
