

# THE OBSERVATIONAL PROSPECTS FOR GW EM FOLLOW-UP AND ENGRAVE

S.D. Vergani  
CNRS - Paris Observatory, Meudon, France

INVITED TALK: I will review the observational efforts done for the electromagnetic (EM) follow-up of GW170817 and draw the current scenario for EM follow-up of GW from BNS or NS-BH systems, dwelling on the ENGRAVE collaboration for GW EM counterpart follow-up with ESO/VLT. I will also mention some perspectives on the follow-up with future instruments and on EM observations of the counterparts of GW discovered by future detectors.
